

Headstamps and Markings on .303 inch British Service Ammunition

by
A. O. EDWARDS

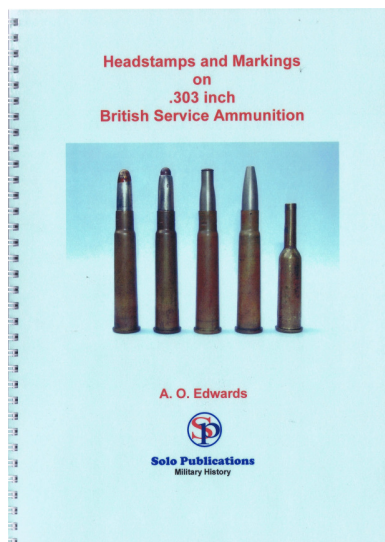

A new guide to the headstamps and markings to be found on British and Commonwealth .303 inch ammunition accepted for service.

In addition to giving full details of headstamping practice throughout the service life of the cartridge, the book includes information on internal case codes, bullet base marks as well as all known manufacturer's codes.

This information, together with details of case colouring, dates and other marks should allow the identity of any specimen to be ascertained easily and accurately. Also included are many colour illustrations of packet labels.

55 pages with over 100 headstamp drawings and 11 pages of colour package labels.

The book has soft covers and is wire bound for ease of use.
